

Bridge Over Bayou Teche State Project No. 713-50-0107 St. Martin Parish

## **Estimated Enhancement Portion Construction Cost is \$ 300,000.00**

The project is located in the City of Breaux Bridge, connecting two state highways.

This project will add funds to an Off-System Bridge project to construct sidewalks along side of the travel lanes. The bridge is a high traffic structure and the sidewalks will allow pedestrians to cross the bridge out of the travel lanes and, thus, avoid any conflicts with vehicles.
